## PROFESSIONAL SUMMARY

Salesforce Developer with hands-on experience in Lightning Web Components (LWC), Apex, Triggers, Flows and REST API integrations. Skilled in building scalable UI components, automating business processes and implementing secure, governor-limit-compliant Salesforce solutions. Strong foundation in Salesforce Administration and Agile development practices. Actively seeking opportunities to contribute to real-world Salesforce implementations.

## EDUCATION

<b>Master of Computer Applications (MCA)</b> Medi-Caps University, Indore	2024 – Present CGPA: 8.54
<b>Bachelor of Computer Applications (BCA)</b> Patliputra University, Patna, Bihar	2021 – 2024

## SKILLS

- Salesforce** LWC, Apex, Triggers, SOQL/SOSL, Test Classes, Async Apex, Governor Limits  
**Administration** Objects & Fields, Validation Rules, Flows, Profiles, Permission Sets, Security Model  
**Integration & Automation** REST APIs, Apex Callouts, Platform Events, Flow Automation  
**Programming** Java (Certified), JavaScript, Apex, Python, C/C++  
**Tools** Salesforce Platform, VS Code, SFDX, Git/GitHub, Postman  
**Data & Deployment** Data Loader, Change Sets, CI/CD Basics

## TRAILHEAD ACHIEVEMENTS

Completed multiple hands-on Trailhead modules and projects focused on Apex programming, Lightning Web Components, Salesforce Administration, API integrations and platform automation.

## PROJECTS

### [Salesforce Portfolio Application](#)

- Built a configurable Salesforce Experience Cloud (LWR) portfolio using Lightning Web Components and Apex, fully managed via Salesforce records and Experience Builder.
- Implemented dynamic profile, social links, resume download, skills, education, certifications, and Trailhead data with responsive SLDS-based UI.
  - Designed mobile-responsive layouts using CSS variables and media queries, converting tabs into accordions for smaller viewports.

### [LWC Utility & Integration Suite](#)

- Developed multiple LWCs including BMI Calculator, Alarm Clock, Currency Converter, Weather App, Employee Survey, and Notes application.
- Implemented client-side logic, form validation, conditional rendering, and real-time UI updates using JavaScript and LWC directives.
  - Integrated external APIs and implemented CRUD using Lightning Data Service and Apex while following governor limits and security best practices.
